Summary

Data Analyst with a strong foundation in SQL, Python, Excel, and Power BI. Skilled in cleaning, analyzing, and visualizing data to generate insights and support data-driven decision-making. Interested in collaborating on meaningful analytical work in fast-paced environments.

Skills

Programming & Querying: SQL, Python
Data Visualization Tools: Advanced MS Excel, Power BI
Analytical Abilities: Data Cleaning, Exploratory Data Analysis (EDA), Insight Generation, Descriptive Statistics

Experience

Data Analyst Intern **Apr 2025 – May 2025**
Elevate Labs (Remote) *Tools Used: Python, SQL, Power BI*

- Cleaned and preprocessed large retail datasets using **Python**, improving data quality and preparing datasets for analysis.
- Used **SQL** queries to extract, filter, aggregate, and analyze business and sales data to identify meaningful trends and patterns.
- Built **Power BI dashboards** to visualize key business metrics, sales performance, and analytical insights for decision-making.
- Evaluated retail and sales data to identify trends, patterns, and business insights that supported strategic planning and reporting.

Projects

AI-Driven Cybersecurity Training Simulator with Real-Time Network Monitoring Dashboard | *Python, ML*
Oct 2025 – Apr 2026

- Developed an AI-based cybersecurity simulator to replicate real-world attack scenarios and support security training.
- Applied anomaly detection techniques to identify suspicious network activity and abnormal traffic patterns.
- Created a real-time monitoring dashboard to visualize network traffic, security alerts, and system events.
- Examined network data streams to detect abnormal patterns and potential security threats.
- Leveraged machine learning and data analysis techniques to improve understanding of intrusion detection and cyber attack behavior.

Drug Recommendation System using Sentiment Analysis | *Python, Django, MySQL* **Sep 2024 – Dec 2024**

- Performed sentiment analysis on patient reviews using **Natural Language Processing (NLP)** techniques to evaluate drug effectiveness and user sentiment.
- Executed **TF-IDF vectorization** and **Linear Support Vector Classifier (LinearSVC)**, achieving **93% classification accuracy**.
- Improved an end-to-end recommendation system using **Python and Django** for automated sentiment classification and drug recommendations.
- Designed and managed a **MySQL relational database** to store patient reviews, sentiment scores, and drug metadata.
- Applied machine learning and data-driven analysis to generate insights from healthcare review data.

Certifications

- **Managed Services Launchpad Program – ERP**, PwC, July 2025
- **Smart Interviews – Bronze and Silver Certificates**
- **Power BI Workshop**, Office Master

Education

CMR Technical Campus **2022 – 2026**
B.Tech in Information Technology *CGPA: 9.06 / 10*
